

Sched'Up

THE WAY TO SCHEDULE UP

- Shir Lev
- Tomer Filiba
- Yana Tartakovsky
- Ofir Ventura

TEL AVIV UNIVERSITY

BLAVATANIK SCHOOL OF COMPUTER SCIENCE

GOOGLE WORKSHOP FOR WEB TECHNOLOGIES, 2013-2014

Progress

- Each team member was responsible for one part of the flow
 - Creating new event
 - My events page and Invited to page
 - Responding to an event
 - Authentication via google account and google API's
 - Building the database

Difficulties vs. Easy Stuff

- **New technologies: Datastore, python, Javascript, CSS, html, JQM, etc...**
 - Migration to Web-App
 - 100 Emails per day limit
 - Google API's required investigation
- Oauth well integrated with app-engine
 - Good design (separation of modules)

Future Features

Feature	Time Estimation
The calendar voting page	2 weeks
Suggest times algorithm	3 days
Profile Page	1 day
Personal Preferences	1 week
Making UI Better + Logo	2 weeks
Editing Existing Event	2 days
Phone-Gap	2 weeks
Facebook login \ creating facebook event	3 days
UI themes by event type	3 days

Road-Map

Milestone

2
